Drying Instructions:

If your roses are fresh, please enjoy them. I don't want to take that from you. Dry them when they start to wilt.

DON'T let your roses sit in water after they've wilted. Water will remain in the rose and this is bad for the petals. TOO MUCH water and time will degrade the rose and color and often creates mold. DO NOT put them in plastic. Don't try to keep them damp. I can not work with moldy roses.

Air dry: Pluck the petals off the rose by twisting the whole rose off of the stem. Discard the stem. Scatter the petals loosely on a paper towel. DRY COMPLETELY and put them in a paper bag ONLY when they are crispy dry. Keep colors separate. NO PLASTIC!

Microwave: Pluck the petals off the rose by twisting the whole rose off of the stem. Discard the stem. Working with 1 rose at a time, scatter the petals loosely on a paper towel. Put the paper towel and the petals in the micro for 30 SECONDS. The petals will shrink and darken a bit. This is normal. The paper will absorb the water and be damp. The petals will stick to the paper. Remove and fluff the petals. Put them back in for another 30 SECONDS. DO NOT OVER COOK! Transfer to a dry paper towel and let them finish air drying. Only put them in a paper bag when the petals are crispy dry. Keep colors separate. NO PLASTIC!

If you are worried about drying them yourself, it's ok. I can do it for you. Bring them to my gallery during normal business hours. Please call ahead first 781-447-2633.

Please no changes. Once I begin your order I am unable to make changes to the number of beads or the shapes I am making. It is a 3-4 MONTH turn around. We will call you when they are ready for pick up.

Care cards and jewelry boxes will be included for each item. Visit angelrosebeads.com for more information.

Payment:

Include payment and the order form with your petals. I accept checks written to Angel Rosebeads, cash or Venmo @D-M-Johnson. I do not accept credit cards. Returned checks are subject to a \$15 fee.
